

## MORETON BAY FIG TREES

The two **Moreton Bay Fig Trees** on the southern corner of the building, were grown from seeds provided by William Guilfoyle. William was curator of Melbourne Botanic Gardens between 1870 -1909.

His brother Joseph lived in Echuca/Moama area and William provided the seeds of many trees in Echuca, including the Moreton Bay Fig trees,

We estimate that they were planted between 1875-1880.
